

## General Description

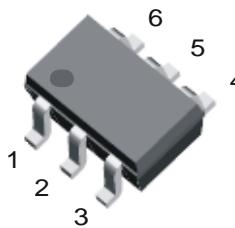

- LMN150B01 is best suited for applications where the load needs to be turned on and off using control circuits like micro-controllers, comparators etc. particularly at a point of load. It features a discrete PNP pass transistor with stable  $V_{ce\_sat}$  which does not depend on the input voltage and can support maximum continuous current of 150 mA up to 125 °C (see fig. 1). It also contains a discrete NPN that can be used as a control. The component devices can be used as a part of a circuit or as standalone discrete devices.

## Features

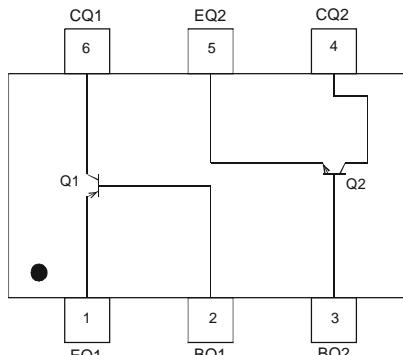

- Epitaxial Planar Die Construction
- Ideally Suited for Automated Assembly Processes
- Lead Free By Design/ROHS Compliant (Note 1)**
- "Green" Device (Note 2)

## Mechanical Data

- Case: SOT-26
- Case Material: Molded Plastic. "Green Molding" Compound. UL Flammability Classification Rating 94V-0
- Moisture Sensitivity: Level 1 per J-STD-020C
- Terminal Connections: See Diagram
- Terminals: Finish - Matte Tin annealed over Copper leadframe. Solderable per MIL- STD -202, Method 208
- Marking Information: See Page 6
- Ordering Information: See Page 6
- Weight: 0.016 grams (approximate)

SOT-26

Schematic and Pin Configuration

## Maximum Ratings, Total Device @ $T_A = 25^\circ\text{C}$ unless otherwise specified

| Characteristic | Symbol    | Value | Unit |
|----------------|-----------|-------|------|
| Output Current | $I_{out}$ | 150   | mA   |

## Thermal Characteristics @ $T_A = 25^\circ\text{C}$ unless otherwise specified

| Characteristic                                                                                                | Symbol          | Value       | Unit  |
|---------------------------------------------------------------------------------------------------------------|-----------------|-------------|-------|
| Power Dissipation (Note 3)                                                                                    | $P_D$           | 300         | mW    |
| Power Derating Factor above 120 °C                                                                            | $P_{der}$       | 2.33        | mW/°C |
| Thermal Resistance, Junction to Ambient Air (Note 3)<br>(Equivalent to one heated junction of PNP transistor) | $R_{\theta JA}$ | 417         | °C/W  |
| Junction Operation and Storage Temperature Range                                                              | $T_J, T_{STG}$  | -55 to +150 | °C    |

Notes:

- No purposefully added lead.
- Diodes Inc.'s "Green" policy can be found on our website at [http://www.diodes.com/products/lead\\_free/index.php](http://www.diodes.com/products/lead_free/index.php).
- Device mounted on FR-4 PCB, 1 inch x 0.85 inch x 0.062 inch; pad layout as shown on Page 7.

**Maximum Ratings: Discrete PNP Transistor (Q1)** @ $T_A = 25^\circ\text{C}$  unless otherwise specified

| Characteristic                       | Symbol    | Value | Unit |
|--------------------------------------|-----------|-------|------|
| Collector-Base Voltage               | $V_{CBO}$ | -40   | V    |

## Application Details

- PNP Transistor and NPN Transistor integrated as one in LBN150B01 can be used as a discrete entity for general purpose applications or as a part of a circuit to function as a Load Switch. When it is used as the latter as shown in Example Circuit Schematic, various input voltage sources can be used as long as they do not exceed the maximum rating of the device. These devices are designed to deliver continuous output load current up to maximum of 150 mA. The use of the NPN as a switch eliminates the need for higher current required to overcome the gate charge in the event an N-MOSFET is used. Care must be taken for higher levels of dissipation while designing for higher load conditions. These devices provide power on demand and also consume less space. It mainly helps in optimizing power usage, thereby conserving battery life in a controlled load system like portable battery powered applications. (Please see Figure below for one example of typical application circuit used in conjunction with a voltage regulator as a part of power management system).

Example Circuit Schematic

## Ordering Information (Note 5)

| Device      | Marking Code | Packaging | Shipping         |
|-------------|--------------|-----------|------------------|
| LBN150B01-7 | PM4          | SOT-26    | 3000/Tape & Reel |

Notes: 5. For packaging details, go to our website at <http://www.diodes.com/datasheets/ap02007.pdf>.

## Marking Information

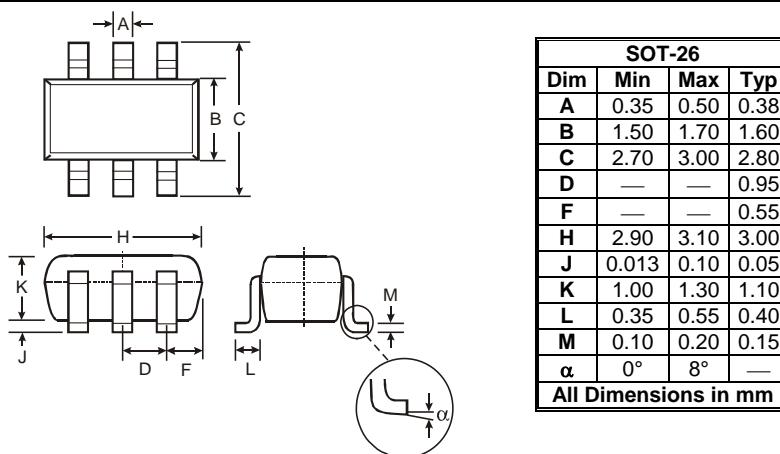

PM4 = Product Type Marking Code  
 YM = Date Code Marking  
 Y = Year ex: T = 2006  
 M = Month ex: 9 = September

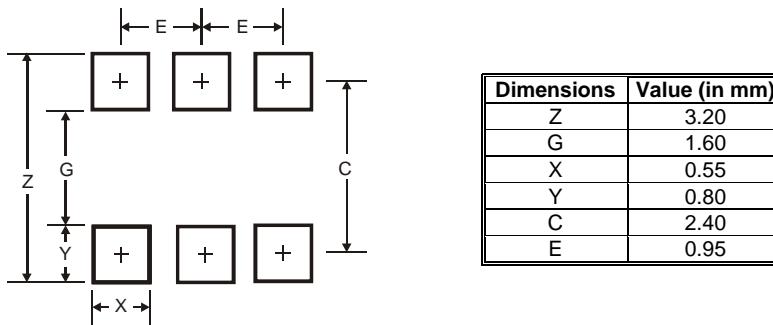

### Date Code Key

| Year  | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 |     |     |     |     |     |
|-------|------|------|------|------|------|------|------|-----|-----|-----|-----|-----|
| Code  | T    | U    | V    | W    | X    | Y    | Z    |     |     |     |     |     |
| Month | Jan  | Feb  | Mar  | Apr  | May  | Jun  | Jul  | Aug | Sep | Oct | Nov | Dec |
| Code  | 1    | 2    | 3    | 4    | 5    | 6    | 7    | 8   | 9   | O   | N   | D   |
