Description and Extent of Change

Lantronix is pleased to announce the availability of new firmware release v3.16.0RC9 for BOLERO40 Series Products.

Improvements and bug fixes:

- Too many GPSTATE:Enable TLS security for WebUpdate events on AVL device while updating FW using HTTPS Web update link with invalid port no

- LUA functions dofile() and loadfile() are implemented
- BOLER043 does not connect to Docomo
- Lua Abort reason as dynamic variable and event eLuaAborted
- Use MONPREF=100 as base for Verizon
- Added command to clear MQTT certificates (PFAL Command: TCP.MQTT.ClearCertificate)
- Increased size for PPP secrets (63 bytes)

Refer to the release notes for a complete list of features and bug fixes.
