### DESCRIPTION

The LTS-3401LWC is a 0.8-inch (20.32-mm) digit height single digit low current seven-segment display. This device utilizes low current red LED chips, which are made from AlGaAs on a non-transparent GaAs substrate, and has a gray face and white segments.

This low current seven-segment display is designed to perform under low power consumption. It is tested and selected for it's excellent low current characteristics. It can be driven in low current condition and the segments are matched. This driving current as low as 1mA per segment is applicable.
