

322-SVW(-DS)

Plug-in terminal strip Screw connection & pin, plug-in direction vertical, long pin

The plug-in terminal strip 322-SVW is available in 10 mm pitch with 2 to 12 poles. It has one screw connection per pole and one vertical pin for the connection to the socket of the female counterpart.

In combination with the 322-FBG plug-in terminal strip, this connector is particularly well suited for PCBs. The plug-in direction to the PCB is horizontal.

When used in combination with a type 323-FBW plug-in terminal strip, the contact pressure is applied by a stainless-steel spring thus providing excellent electrical contact. Due to the guided plug insertion from top, this angular plug-in connector combination is well suited for challenging mounting conditions.

The through-wiring for this angular plug-in connector with plug-in terminal strip 323-PHFBW is achieved by means of screw connections. The individual consumer is wired at the plug connection.

The wire protector of the "DS"-version reliably prevents damage to multi-wire flexible conductors by the turning screw.

These terminals strips can be screw-mounted on a substrate.
