

## HT73XX-A series

LDO linear regulator

### ■ Product introduction

HT73XX-A series is a positive voltage regulator circuit with low voltage difference, high precision output voltage and ultra-low power consumption current developed by practical CMOS technology. Due to the built-in low on state resistance transistor, so the output voltage difference is low, and it has high input voltage bearing capacity. The maximum working voltage can reach 12V, which is suitable for the application circuit requiring high voltage withstand.

### ■ Product features

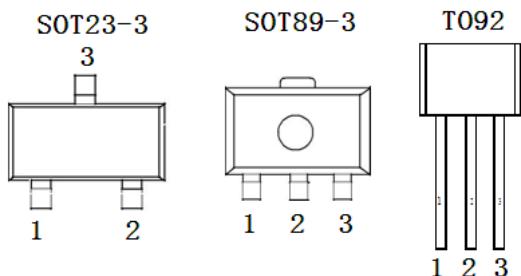

- High accuracy of output voltage: accuracy  $\pm 3\%$
- Ultra low power consumption current: typical value 3ua
- Low output voltage temperature drift: 50 ppm / °C
- High input withstand voltage: increase to 12V and keep output voltage stable
- Package form: TO-92, sot89-3, sot23-3

### ■ Product use

- Regulated power supply using battery powered equipment
- Stabilized power supply for toys
- Stabilized power supply for portable medical instruments
- Stabilized power supply of communication equipment
- Regulated power supply for mobile phone

### ■ Package form and pin function definition

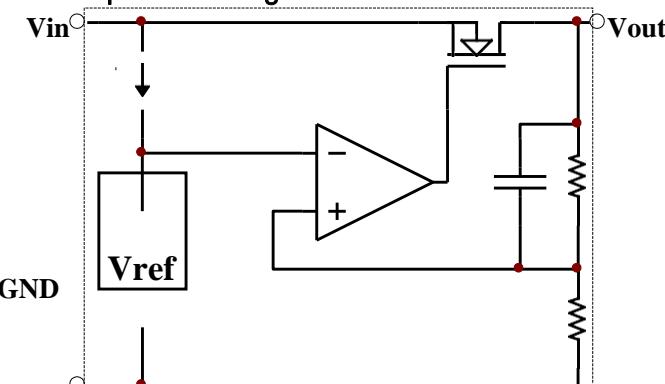

| Pin No |          |          | Pin definition | Function description |
|--------|----------|----------|----------------|----------------------|
| TO -92 | SOT89 -3 | SOT23 -3 |                |                      |
| 1      | 1        | 1        | GND            | Chip ground terminal |
| 2      | 2        | 3        | VIN            | Start input          |
| 3      | 3        | 2        | VOUT           | Chip output          |

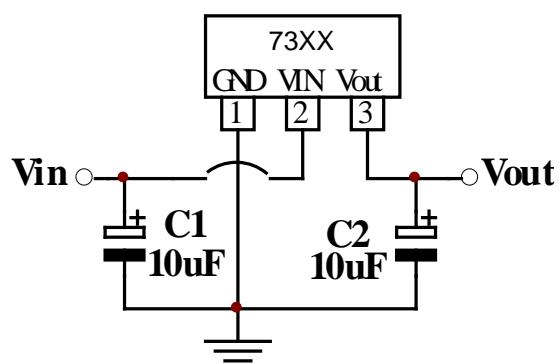

### ■ Model selection

| Name     | Model     | Maximum input voltage (V) | Output voltage (V) | Tolerance | Packaging                  |
|----------|-----------|---------------------------|--------------------|-----------|----------------------------|
| HT73XX-A | HT7318-A  | 12                        | 1.8                | $\pm 3\%$ | TO92<br>SOT89-3<br>SOT23-3 |
|          | HT7325 -A | 12                        | 2.5                | $\pm 3\%$ |                            |
|          | HT7327-A  | 12                        | 2.7                | $\pm 3\%$ |                            |
|          | HT7330-A  | 12                        | 3.0                | $\pm 3\%$ |                            |
|          | HT7333-A  | 12                        | 3.3                | $\pm 3\%$ |                            |
|          | HT7336-A  | 12                        | 3.6                | $\pm 3\%$ |                            |
|          | HT7350-A  | 12                        | 5.0                | $\pm 3\%$ |                            |

■ Principle block diagram

■ Application circuit

■ Limit parameter

| Project     | Symbol         | Parameter             | Limit value | Company |
|-------------|----------------|-----------------------|-------------|---------|
| Voltage     | VIN            | Maximum input voltage | 15          | V       |
| Power waste | PD             | power waste           | 400         | mW      |
| Temperature | T <sub>w</sub> | working temperature   | -25 - 70    | °C      |
|             | T <sub>c</sub> | Storage temperature   | -50 - 125   | °C      |
|             | T <sub>h</sub> | welding temperature   | 260         | °C, 10s |
