

# GX14 350+ Amp 12-800 Vdc Contactor

## **FEATURES**

- Chassis level power terminals No need for specially routed power cables, special bus bars, or special lugs.
- Rugged <u>EPIC®</u> seal rated to 175°C Reduced risk of fire or meltdown in over current conditions. The same technology used for advanced aerospace programs.
- Hermetically sealed UL recognized: UL1604 for Class I & II, Div 2 and Class III for use in hazardous locations, IP67 for temporary water immersion for 30 min, IP69K for pressure washing, SAE J1171 external ignition protection, and IS08846 for protection against ignition around flammable gasses.
- High Efficiency Dual DC Coils Very low 12, 24 or 48 VDC continuous coil power with no EMI emissions or crosstalk on your system control power. Ideal for battery powered systems or where low power is needed.
- Built-in coil suppression for all DC coils Saves you engineering time and parts cost to add external coil suppression.
- Stainless steel nuts and mounting inserts, for years of corrosion free service.
- > Not position sensitive can be mounted in any position for ease of installation.

# ADVANCED SWITCHING SOLUTIONS

## **PRODUCT SPECIFICATIONS**

Specifications	Units	Data
Contact Arrangement		
Main	Form X	SPST-NO
Auxilary (2A, 24VDC) <sup>1</sup>	Form A or B	SPST-NO or SPST-NC
Mechanical Life	Cycles	1,000,000
Contact Resistance <sup>2</sup>		
Мах	mohms	0.4
Typical	mohms	0.15 to 0.3
Operate Time <sup>3</sup>		
Мах	ms	20
Typical	ms	13
Release Time, Max	ms	12
Insulation Resistance <sup>4</sup>	Mohms	100
Dielectric At Sea Level (Leakage < 1mA)	VRMS	2,200
Shock, 1/2 Sine, 11ms	G peak	20
Vibration, Sinusoidal (500-2000 Hz Peak)	G	15
Ambient Temp Range		
Operating <sup>5</sup>	°C	-55 to +85
Storage	°C	-70 to +150
Weight, Typical	Kg (Lb)	0.5 (1.1)
Environmental Seal	Exceeds IP67 & IP69K	
Salt Fog	MIL-STD-810	

## POWER SWITCHING AND CURRENT CARRY RATINGS

### DC POWER SWITCHING CYCLES<sup>9</sup>

## **COIL RATINGS at 25°C**

Coil P/N Designation	В	С	F
Coil Voltage, Nominal	12 VDC	24 VDC	48 VDC
Coil Voltage, Max	16 V	32 V	64 V
Pick-Up Voltage, Max <sup>6, 8</sup>	8 V	16 V	40 V
Drop-Out Voltage	0.5 to 4 V	2 to 7.5 V	4 to 15 V
Pick-Up Current, Max (75 ms) <sup>6, 7</sup>	3.9 A	1.6 A	0.97 A
Coil Current <sup>7</sup>	0.23 A	0.097 A	0.042 A
Coil Power <sup>7</sup>	2.8 W	2.3 W	2.0 W
Internal Coil Suppression			
Coil Back EMF	55 V	55 V	125 V
Transients, Max (13 ms)	±50 V	±50 V	±75 V
Reverse Polarity	16 V	32 V	64 V

# DIMENSIONS

#### Mounting

M5 Bolts

#### **Case Material**

DuPont Zytel FR50 (25% Glass Filled Nylon)

#### **Power Connection**

Stainless M10x1.5 Bolt Stainless M10x1.5 Flanged Nut

Torque 14-20Nm [125-175in-lb]

#### Coil Wire

Silicone, 20 AWG, UL: VW-1

Auxiliary contacts

X1(+)

# PART NUMBER SYSTEM

GX14	В	Α	В
Coil Voltage	<b>B</b> = 12 Vdc, Internal Coil Suppression		
	<b>C</b> = 24 Vdc, Internal Coil Suppression		
	<b>F</b> = 48 Vdc, Internal Coil Suppression		
Coil Termination		A = Flying leads 38 cm (15 in)	
		$\mathbf{B}$ = Flying leads 61 cm (24 in)	
		$\mathbf{C}$ = Flying leads 122 cm (48 in)	
		<b>D</b> = Coil Terminals, not available with Auxiliary Contacts	
Auxiliary			Blank = None
Contact			<b>B</b> = SPST, Normally Open
			<b>C</b> = SPST, Normally Closed

# **APPLICATION NOTES**

• Contactors feature internal transorb for coil suppression. <u>No external</u> <u>diodes</u> should be added across the coil. The use of additional external coil suppression can slow the release time and invalidate the life cycle ratings, or can cause the contactor not to be able to interrupt the maximum current specified. If lower coil back EMF is required, please contact GIGAVAC for assistance.

• Power switching lifecycles are based on <u>current flow</u> from A2(+) to A1(-). For best breaking performance, the contactor should be installed so that current flows from A2(+) to A1(-). There are cases where the contactor will interrupt power in the opposite direction but please contact GIGAVAC to confirm suitability. Direction of current flow is not relevant during make or when flowing on closed contacts. For bi-directional contactors, please contact GIGAVAC.

Applications with <u>capacitors</u> will require a pre-charge circuit.

• Electrical life rating is based on resistive load with  $27\mu H$  maximum inductance in circuit. Because your application may be different, we suggest you test the contactor in your circuit to verify life is as required.

• End of life is defined as when the dielectric, insulation resistance or contact resistance fails the specifications listed.

### Notes & Definitions:

**1** Auxiliary contact rating is 2A, 24Vdc Resistive load, 100,000 cycles. Minimum current is 0.1mA, 5V. The auxiliary contact is mechanically linked to the main power contacts.

**2** Contact resisitance measured at currents higher than 100A.

 ${\bf 3}$  Operation time is measured at 25°C and includes maximum 7ms bounce.

4 Insulation resistance is 50 Mohms after life.

**5** Contactor can operate up to 125°C in special cases - contact GIGAVAC for details.

**6** <u>Contactor has two coils.</u> Both are used for pick-up, and then in approximately 75 milliseconds, one coil is electronically removed from the coil drive circuit. The remaining coil supplies low continuous hold power sufficient for the contactor to meet all of its specified performance specifications. This provides low coil power without PWM electronics that can cause EMI emissions and/or cross-talk on control power.

**7** Contactor is operated by a coil that changes resistance with temperature. Since Pick-up Current, Coil Current and Coil Power are specified at Nominal Voltage, they will be lower than indicated at temperatures above 25°C and higher than indicated at temperatures below 25°C. Similarly, Pick-up and Drop-out Voltages will be higher than indicated at temperatures above 25°C and lower than indicated at temperatures below 25°C.

**8** For pick-up testing of contactors with dual coils, the voltage can not be ramped up slowly, but must be applied instantly to at least the maximum Pick-up Voltage. Otherwise, the contactor will not pick-up.

**9** Limit make current to 600A to avoid contact welding. For AC power switching cycles, contact factory.
