

New Design In Stop Notice

Leaded PTC Thermistor: PTG/PTF*** series

Dear. Valued Customer

Thank you very much for your great and continued support for business with Murata.

This is the official notification that some of our products detailed below shall be out of sales promotion with the immediate effect.

Please review this, and refrain from designing the products affected into your new models and projects.

Your understanding and support are highly appreciated.

1. Product Type, Murata Part Numbers:

PTG/PTF** Series

Please refer to the attached documents for detailed Part Numbers' information.

2. Reasons/Background:

Leaded PTC thermistor is used for overcurrent protection, overheat protection and inrush current limiter in variety of products. Considering trend of the targeted market, decreasing demand of leaded products and tough competition with other manufactures, we decided to announce NRND for leaded PTC thermistor. We are going to put our future focus on SMD products.

Also, please be informed that these parts will be withdrawn as per the schedule below.

The official notification of the Product Withdrawal will be submitted 6 months later

Official Notification of Withdrawal	Mar 2021.
-------------------------------------	-----------

Last Time Order Due	Mar. 2022
---------------------	-----------

3. Contact Window:

Should you have any questions or concerns, please contact Murata Sales, Representative, or Distributor in your area.

Truly Yours. Thank you.

Murata Manufacturing, Co., Ltd.

Plannig Department. Functional Device Division.
