### DESCRIPTION

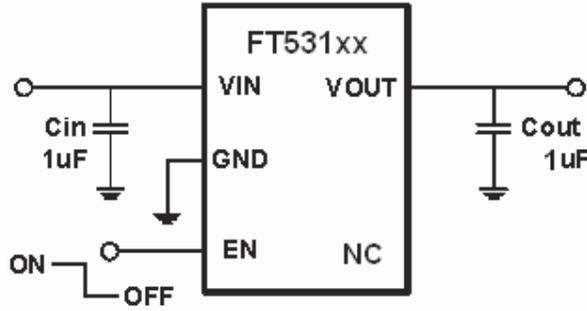

The FT531xx is designed for portable RF and wireless applications with demanding performance and space requirements. The FT531xx performance is optimized for battery powered systems to deliver ultra low noise and low quiescent current. Regulator ground current increases only slightly in dropout, further prolonging the battery life.

The FT531xx also works with low-ESR ceramic capacitors, reducing the amount of board space necessary for power applications, critical in hand-held wireless devices. The FT531xx consumes less than 0.1uA in shutdown mode and has fast turn-on time less than 100uS. The other features include low dropout voltage, high output accuracy, current limiting protection, and high ripple rejection ratio. The FT531xx is available in the 5-lead of SOT-23-5(L), SC-70 and the 3-lead of SOT-23-3(L), SOT-89-3(L), SOT-23 packages.

### APPLICATIONS

- CDMA/GSM Cellular Handsets
- Battery-Powered Equipment
- Laptop, Palmtops, Notebook Computers
- Hand-Held Instruments
- PCMCIA Cards
- Portable Information Appliances
