MFS

Sub-miniature Switches

RoHS Compliant

■Common Specifications -

Initial contact resistance

Measured at 1.5mA 200 µVAC 1kHz

Dilectric strength

Measurement at 500 VAC.

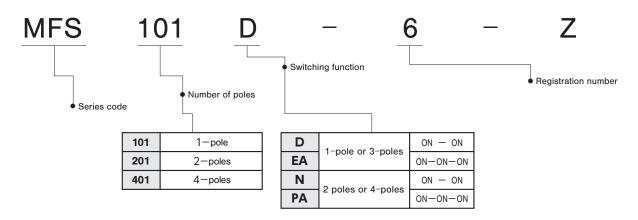

●Insulation Resistance

Measured at 500VDC

Operating temperature range

-10°C~+70°C

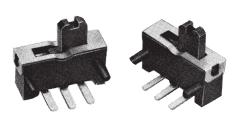

■Part Numbering

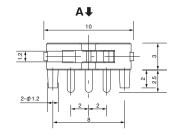

■PC Hole Layouts

Non-shorting

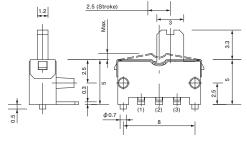

Rating Max. DC10V 0.3A (Resistive load)

Rating	IVIAX.	DCTOV 0.3A (Resistive load)
natility	Min.	DC5V 10mA (Resistive load)
Initial contact resistance		20mΩ Max.
Dielectric strength		AC500V 1 minute
Insulation resistance		100MΩ Min.
Electrical life		5,000 cycles
Operating force		0.98~2.94N
Switch timing		Non-shorting

■Soldering

(1) Manual Soldering

Device: Soldering iron

Please refer to "MFS Series Heat-resistant Table" shown below.

(2) Auto Soldering

MFS series are not compatible with auto soldering. Soldering should be done manually.

(3) When soldering two or more terminals to the common land, use solder resist to solder them independently.

Flux Cleaning

- (1) Solvent: Fluorine or Alcohol type.
- (2) MSF Series are not process sealed. If the PC board is to be cleaned, clean the soldering surface of substrate with a brush so that the switch is not exposed to the cleaning solution.

Frequency of switch use

If the switch is not likely to be operated frequently (e.g. two or three operations a year) in the dry circuit area, a sulfide film is likely to be formed on the contacts, resulting in contact failure. If this is the case, gold-plated products are recommended. Please contact your local Nidec Copal Electronics sales representative.
