Quick access to product information

Get technical information about your product

This screenshot shows a catalog page for Schneider Electric's Harmony XB5 plastic pushbutton series. It includes a sidebar with references and a main table with columns for Product name, Description, Type and function, Color, Mounting diameter, Reference, and Weight (g). The table lists various options like 'Complete unit', 'Push button', 'Push button with marking', and 'Heads only'. A note at the bottom states: 'Double-headed pushbutton with 1 white central pilot light block. (1) Some colors require customization according to the availability of components.'

Each commercial reference presented in a catalog contains a hyperlink. Click on it to obtain the technical information of the product:

- Characteristics, Dimensions and drawings, Mounting and clearance, Connections and schemas, Performance curves
- Product image, Instruction sheet, User guide, Product certifications, End of life manual

This screenshot shows the product details page for the XB5AL73415 pushbutton. It features a large image of the product, its reference number (XB5AL73415), its color (green flush/red), and its description ('green flush/red projecting double-headed pushbutton Ø22 with marking'). Below the image are links to download the datasheet and other documents. On the right, there are tabs for Characteristics, Dimensions, Drawings, Mounting and Clearance, Documents & Downloads, and Main product details. The Main section provides detailed technical specifications such as Range of product (Harmony XB5), Product or component type (Complete double-headed push-button), Bezel material (Plastic), Fixing collar material (Plastic), Head type (Standard), Mounting diameter (22 mm), Shape of signaling unit head (Rectangular), Type of operation (Spring return), Operator profile (1 flush - 1 projecting push-buttons), Operators description (Green "I", red "O"), Contacts type and composition (1 NO + 1 NC), and Contact operation (Slow-break).

Find your catalog

General presentation

The Telefast system is a set of products for rapid connection of I/O modules (24 V discrete, analog, and counter) to operative parts. It acts as a substitute for screw terminal blocks, remotely locating and partly eliminating the single-wire connection. The Telefast system only connects to channels that have HE 10 and SUB-D connectors or to standard terminal blocks with a cabled connector. It consists of connecting cables and interface sub-bases. The relay and connection functions, with or without polarity distribution, considerably reduce wiring time and eliminate the risk of error.

Connections between the PLC and the operative part

Connection between the PLC and Telefast sub-bases

Telefast sub-bases connect directly via cables onto all discrete I/O modules equipped with HE 10 connectors **1**.

I/O modules not equipped with HE 10 connectors are connected to Telefast sub-bases by means of a cabled connector, which consists of a cable with conductors (AWG 22/0.34 mm² c.s.a.) connected to the standard terminal block at one end and to the HE 10 connectors at the other. These cabled connectors are available in 1.5 and 3 m (4.92 and 9.84 ft) lengths.

Connection between Telefast sub-bases and the operative part

The Telefast range is suitable for several types of connection found in control system devices.

■ Connection of I/O located in the PLC cabinet **A** or nearby **B**

Some sub-bases **2** enable two wires (signal and common) or three wires (signal, 24 V, 0 V) to be connected directly from sensors or preactuators when these **10** are installed in the same enclosure or very close by. They effectively eliminate all intermediate terminal blocks.

Other versions offer the possibility of adapting the voltage or current via plug-in relay sub-bases **3**, or of connecting analog signals **9**.

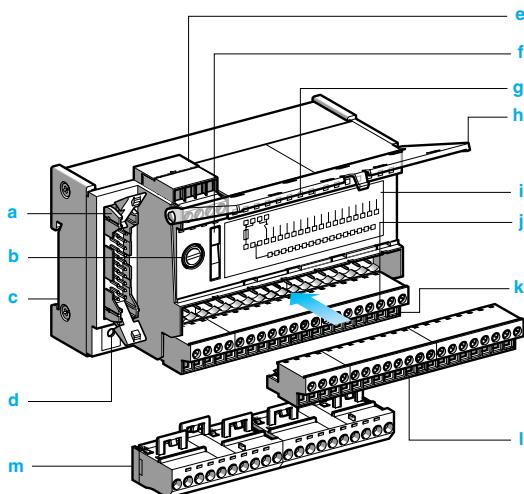

In cases where size is of prime importance **D**, fixed relay sub-bases **ABE7R16S111 5** (125 mm (4.92 in.) long) and passive sub-bases **ABE7H16R50 6** (84 mm (3.31 in.) long) reduce the required surface area by about 50% compared with standard products.

■ Connection of I/O located outside the PLC cabinet **C**

These sub-bases **4** fulfill the same function as traditional terminal blocks and connect connector leads from sensors or preactuators **7, 8**.

■ IP67 dust and damp-proof connections for enclosures and cabinets

8-channel versions offer, in addition, the possibility of directly connecting **Modicon ABE9** dust and damp proof splitter boxes (see page 58) **11** for 8 sensors.

Description of a Telefast® 2 connection sub-base

All connection sub-bases in the Telefast family have a standardized design and offer the common functions described below.

Some of these functions are optional*.

- a 20-way HE10 connector
- b 24 V --- power supply circuit fuse
- c DIN rail mounted
- d 24 V --- display LED
- e 24 V --- power supply terminal block (1)
- f Blade type isolator on --- 0 V
- g Channel indication LED*
- h User label-holder/cover
- i Wiring diagram
- j Test point for Ø 2.3 mm (0.09 in.) plug
- k Upper terminal block (1)
- l Lower terminal block (1), offset by ½ step*
- m Additional snap-on terminal block equipped with 20 screw or spring terminals*

(1) Removable screw or spring type, according to reference, at 5.08 mm (0.2 in.) intervals.

Passive connection sub-bases

Designed to simplify I/O connection to a PLC within a control panel, the range of passive sub-bases has the same functions as traditional terminal blocks to which they add, depending on the models: compact size, connection of proximity sensor commons (3-wire and type 2), LED indication, protected and isolated channels. For high sales volume products, screw or spring connections are available (references ending with E).

Terminal block sub-bases

ABE7H●●R11/R10: These products can be used to connect inputs or outputs. The commons are made on the device and brought into the sub-base by a single wire. The output terminals are on a single row. The signal state for each channel can be indicated via an LED (R11) or not (R10). An **ABE7BV20** terminal block can be added.

ABE7H20E●●: These **economy** products are supplied with a direct connection cable for TSX Micro, Premium, or other PLCs using splitter sub-bases (**H20E**). The cable is available in various lengths. The output terminals are on 2 rows.

Compact sub-bases

ABE7H●●R50: These products fulfill the same functions as the sub-bases above but they are almost half the size.

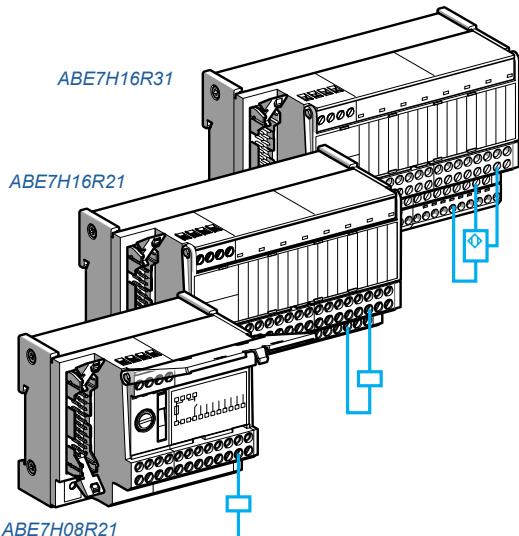

The output terminals are on 2 rows.

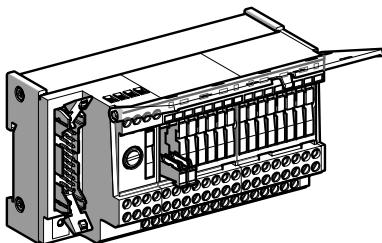

ABE7H16C1●: These are **miniature** products. The signal state for each channel can be indicated via an LED (C11) or not (C10). The output terminals are on a single row. An **ABE7BV20** terminal block can be added.

Universal sub-bases

ABE7H●●R21/R20: These sub-bases are used to connect I/O and all the commons. The potential (0 V or 24 V ---), distributed over the row of screw terminals that allow the commons to be connected, is selected via a jumper. Both wires from the sensor or actuator can be connected to the sub-base. The output terminals are on 2 rows. The signal state for each channel can be indicated via an LED (R21) or not (R20).

ABE7H16C21/CM21: These are **miniature** products. The signal state for each channel can be indicated via an LED. Reference **CM21** has 2 common connections that allow both the inputs and the outputs to be connected at the same time, with a 0 or 24 V common, depending on the customer's wiring. The output terminals are on 2 rows.

ABE7H16S21

Passive connection sub-bases (continued)

Sub-bases for 2-wire sensors

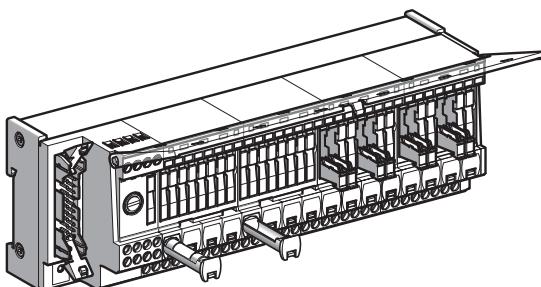

ABE7H16R23: This product is identical to the [ABE7H16R21](#) sub-bases but, in addition, enables connection of 2-wire type 2 sensors on the TSX Micro and Premium PLCs, and NUM numerical controllers. The output terminals are on 2 rows.

Sub-bases for 3-wire sensors

ABE7H16R31: The 24 V --- and 0 V signals are brought into the sub-base for each channel. The output terminals are on 3 rows. This function can also be achieved by adding an [ABE7BV20](#) add-on terminal block to the [ABE7H16R21/R20](#) sub-bases.

The signal state for each channel can be indicated via an LED (**R31**) or not (**R30**).

ABE7H16C31: These are **miniature** products. They also enable connection of inputs equipped with 3-wire proximity sensors. The output terminals are on 3 rows.

ABE7H16S43

Sub-bases with isolator for each channel

ABE7H $\bullet\bullet$ S21: These products have the same function as the [ABE7H16R21](#) universal sub-base.

They also have a blade isolator for each channel.

Sub-bases with isolator and protection for each channel

ABE7H16S43: These products are used exclusively for connecting 24 V --- **inputs**.

Both wires are brought to the screw terminals on a single row.

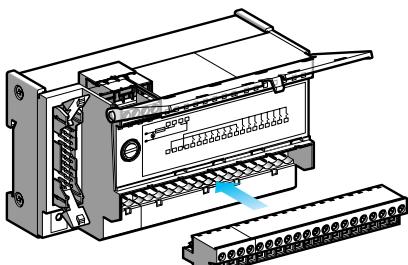

Each channel has 2 blade isolators, attached together, to isolate the signal and its 24 V --- power supply.

The 24 V --- power supply to each channel is protected by a 5 x 20 fuse. A red LED indicates if the fuse has blown.

ABE7H16F43: These products are designed for connecting 24 V --- **outputs**.

Both wires are brought to the screw terminals on a single row.

Each channel has 2 blade isolators, attached together, to isolate the signal and its 0 V common.

ABE7R16S111

Electromechanical relay output sub-bases

Relay output sub-bases are designed to adapt both current and voltage signals. They also have the following functions, depending on the model: various contact combinations (1 NO, 1 C/O, 2 C/O), common potentials, channel protection by 5 x 20 fuse.

There are 3 ranges of sub-bases: fixed relay, plug-in relay, and high-performance. For high sales volume products, screw or spring connections are available (references ending with E).

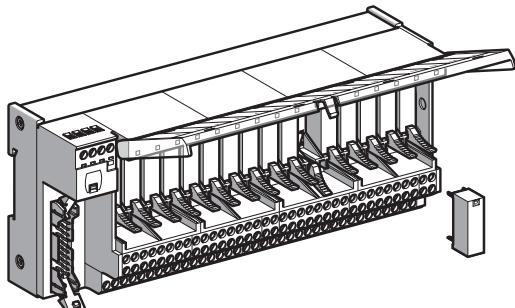

Sub-bases with fixed relays and removable terminal blocks

ABE7R $\bullet\bullet$ S21•: These products are equipped with a fixed relay with integral NO contact, 10 mm (0.39 in.) wide. Their 5 A Ith characteristic must be derated according to the duty cycles used and the number of operations required.

They are available in 8 and 16-channel module formats. All the terminal blocks are removable.

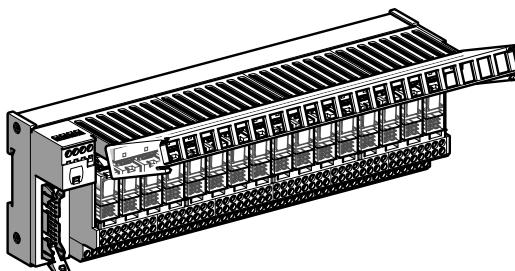

ABE7R $\bullet\bullet$ S111: Almost 50% smaller than the standard sub-bases, these products have a fixed relay with integral NO contact, 5 mm (0.2 in.) wide. Their 2 A Ith characteristic must be derated according to the duty cycles used and the number of operations required. They are available in 8 and 16-channel module formats. All the terminal blocks are removable.

816406

ABE7R16T2••

816405

ABE7R16T3••

Electromechanical relay output sub-bases (continued)

Plug-in relay sub-bases

ABE7P16T2•• and 7R16T2••: These products may or may not be equipped with plug-in relays, with integral NO or C/O contact, 10 mm (0.39 in.) wide. Their 5 A I_{th} characteristic must be derated according to the duty cycles used and the number of operations required. They are available as 16-channel modules only.

It is possible to combine ABR7S2• electromechanical relays and ABS7S•2• solid state relays on the same sub-base. Some sub-bases, not equipped with relays, are offered with 5 x 20 fuse protection for each channel.

ABE7•16T11/M111: These **miniature** products use plug-in relays, 5 mm (0.2 in.) wide, with integral NO contact, rated up to 5 A. These products are pre-equipped with relays (**R**) or not (**P**). They can accept both electromechanical and solid state relays.

ABE7•16M111 sub-bases offer two connection methods, which make it possible to connect both inputs and outputs and obtain 8 inputs (passive connection) and 8 outputs (active relay connection). The signal state for each channel can be indicated via an LED. The terminals are on one row and the commons are brought in in groups of 4. The sub-base is supplied with a relay extractor; this accessory is also available as a spare part.

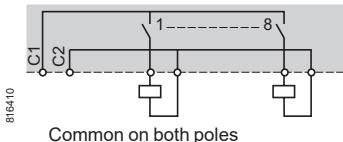

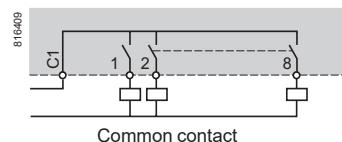

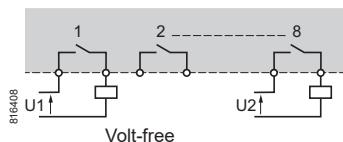

High-performance sub-bases for plug-in relays

ABE7P••T3•• and 7R16T3••: These products may or may not be equipped with plug-in relays, with integral 1 C/O or 2 C/O contacts, 12 mm (0.47 in.) wide. Their 8 A I_{th} characteristic must be derated according to the duty cycles used and the number of operations required.

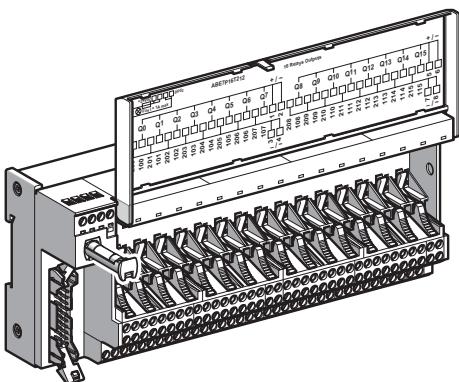

The relays are equipped with reinforced Faston type clips for easy attachment. They are available in 8 and 16-channel module formats. It is possible to combine ABR7S3• electromechanical relays, ABS7S•3• solid state relays, and the **ABE7ACC21** continuity block on the same sub-base. Some sub-bases, not equipped with relays, are offered with 5 x 20 fuse protection and isolation for each channel.

Connections

These relay sub-bases can be connected according to three possible schemes: volt-free, contact common, and common on both poles.

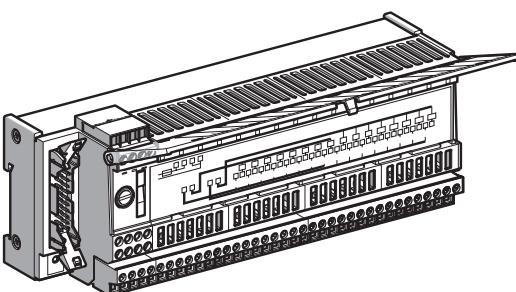

816414

ABE7P16T215

816412

ABE7S16E2B1

Solid state input or output sub-bases

Solid state input or output sub-bases are designed to adapt both current and voltage signals. They can be used to interface either inputs or outputs. Their technology enables high-speed signal switching, while maintaining a high level of electrical durability. For high sales volume products, screw or spring connections are available (references ending with E).

Input adapter sub-bases

ABE7S16E● sub-bases equipped with solid state channels:

These sub-bases enable sensors with different voltages to be connected (24 V \square to 230 V \sim depending on the reference).

These products provide electrical isolation for the various power supply inputs. They are available as 16-channel modules only and the terminal blocks are removable.

ABE7P16F● sub-bases for plug-in solid state relays:

These sub-bases enable sensors with different voltages to be connected (24 V \square to 230 V \sim), either on each channel or on each group of 8 channels.

They are available as 16-channel modules only.

The solid state relays are available separately. It is also possible to equip the sub-bases with electromechanical relays (please consult your Regional Sales Office).

Output adapter sub-base

ABE7S●S● sub-bases equipped with solid state channels:

These sub-bases enable actuators to be connected at 24 V \square . The outputs are not isolated. The output current is either 0.5 or 2 A per channel depending on the products. The occurrence of overloads or short-circuits on the outputs can be transmitted to the PLC to be managed by program. These "fault signal" functions can only be used with TSX Micro and Premium PLCs, or with any other PLCs that have protected outputs.

They are available in 8 and 16-channel module formats, and the terminal blocks are removable.

Plug-in solid state relays

ABS7S plug-in relays are not available mounted directly on the sub-bases. They have to be ordered separately.

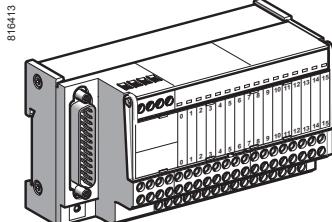

These relays are available for two power levels:

5 V \square to 240 V \sim /0.5 A, 10 mm (0.39 in.) wide. These are for mounting on ABE7P16T2● sub-bases.

5 V \square to 240 V \sim /1.5 and 2 A, 12 mm (0.47 in.) wide. These are for mounting on ABE7P16T3● sub-bases.

It is possible to combine electromechanical relays, solid state relays, and continuity blocks on the same sub-base.

They are available as 16-channel modules only.

ABE7CPA02

816413

Analog sub-bases and special functions

Analog signals are connected on the following products:

- **ABE7CPA01** sub-base for counter modules in the TSX Micro and Premium ranges. This also communicates with the Altivar 18 variable speed drive.
- **ABE7CPA02** sub-base for connection and distribution of 8 channels over screw terminals while maintaining shielding continuity.
- **ABE7CPA21** sub-base with identical functions to the previous sub-base for the 4 analog output channels.
- **ABE7CPA03** sub-base, which can also supply 2 or 4-wire sensors, channel by channel, with 24 V --- protected voltage and current limiting at 25 mA. It also ensures continuity of the current loops when the 25-way SUB-D connector is unplugged.
- **ABE7CPA31** sub-base for distribution and isolation of the 24 V --- power supply required for the 8 analog input channels while maintaining isolation between channels of the TSXAEY810 module. All channels are self-limited to 25 mA.
- **ABE7CPA11** sub-base, which enables the value from a parallel output absolute encoder to be read (binary or GRAY code). It is connected to a counter or axis control module in the Premium range.
- **ABE7CPA12** sub-base, which can be used to connect 16 thermocouples and to increase the temperature of the cold junction compensation terminals, either by a probe integrated in the sub-base, or remotely via an external PT100 probe. In the latter case, only 14 thermocouples can be connected.

Accessories for connection sub-bases

The Modicon Telefast pre-wired system offers a range of accessories to simplify the installation of equipment and to enable full use of all features offered by the connection sub-bases.

Cable connections to the PLC

Cables

Only **ABFH20H \bullet 000** cables, made from rolled ribbon cable and HE 10 insulation piercing connectors, are truly universal. Owing to their small size, they can be connected to any I/O modules or terminal blocks equipped with 20-way HE 10 connectors. They are available in lengths of 0.5 to 5 m (1.64 to 16.4 ft), but the user can create custom cables up to a maximum length of 30 m (98.43 ft) using additional cable and HE 10 connectors.

TSXCDP \bullet 03 molded cables are only used with the TSX Micro and Premium ranges. They are multicore cables and have a high quality finish.

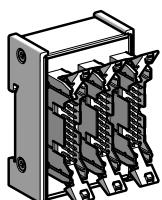

Custom cables are also available for the Allen Bradley and Siemens ranges of PLCs.

Splitter sub-bases

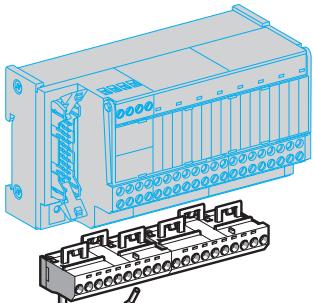

When module configuration and signal distribution are not compatible, the Telefast system can use **ABE7ACC0 \bullet** splitter sub-bases:

- 16 channels (2 x 8) for all 16-channel outputs
- 24 channels (3 x 8) for DST2472 modules
- 32 channels (2 x 16) for NUM inputs
- 24 channels (3 x 8) for NUM outputs

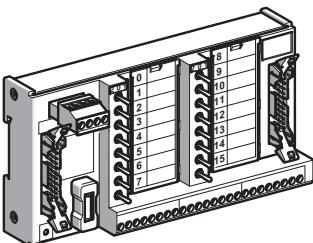

Other sub-bases enable I/O redundancy on 2 input modules in parallel (**ABE7ACC11**) or on 2 output modules in parallel (**ABE7ACC10**).

ABE7ACC02

[ABE7BV20](#)

[ABE7TES160](#)

Accessories for connection sub-bases (continued)

Cabling accessories

Cable gland assembly

Using the cable gland assembly enables 3 cables to run outside the enclosure without the addition of a series connection.

ABE7BV10 and ABE7BV20 add-on terminal blocks

With 8 and 16 channels, these products give wider connection options: common, shielding, etc.

Other accessories

Plug-in continuity blocks

Available in 10 and 12 mm (0.39 and 0.47 in.) widths, the blocks are mounted on ABE7P16T $\bullet\bullet\bullet$ relay sub-bases in place of ABR7 and ABS7 modules. They make use of the sub-base functions to connect the channel without the need to adapt the channel using a relay.

ABE7TES160 simulator sub-base

This can be used to force or inhibit the discrete I/O.

5 x 20 fuses

References for all fuses can be found under accessories.

Label marking software

This produces finished labels for channels, simplifying installation and reducing the risk of error during maintenance by marking the labels according to the sub-base mounting. The program runs under Windows.

(1) The sub-bases are supplied as standard with electromechanical relays, all or some of which can be replaced by solid state relays of the same width (it is possible to combine these different technologies on a single sub-base).

(2) Two connection methods are available, enabling inputs and outputs to be connected to the same sub-base at the same time.

(3) Per group of 8 channels.

(4) Not equipped with relays.

(5) To be used with ABR7S21 relay for ABE7P16T210 sub-base and ABR7S23 relay for ABE7P16T230• sub-base.

Modicon ABE7 connection sub-bases

Connection sub-bases for Modicon X80 I/O modules

(1) The 24 V--- power supply is connected using Modicon Telefast ABE7 sub-bases only. The 0 V--- connections must be equipotential.

Presentation

I/O modules on the Modicon X80 platform

- 1 Discrete input modules (BMXDDI●●02K), discrete output modules (BMXDDO●●02K), and discrete mixed I/O modules (BMXDDM3202K) equipped with one or two 40-way FCN connectors. The modularity of each module (●●) is 32 or 64 channels.
- 1-b Analog input or output modules:
 - Analog inputs: **BMXAMI0410** (4 channels), **BMXAMI0800** (4 channels), and **BMXAMI0810** (8 channels)
 - Analog outputs: **BMXAMO0210** (2 channels), **BMXAMO0410** (4 channels), and **BMXAMO0802** (8 channels)
- 1-c Analog input modules **BMXART0414** (4 channels) and **BMXART0814** (8 channels)
- 1-d HART analog I/O modules **BMEAHI0812** (8 channels) and **BMEAHO0412** (4 channels)
- 2 2 types of cordset are available depending on the type of discrete module connected to the sub-base (for combinations, see [page 28](#)). These cordsets are available in 0.5, 1, 2, 3, 5, or 10 m/1.64, 3.28, 6.56, 9.84, 16.40, and 32.81 ft lengths:
 - **BMXFCC●●●1** cordsets with 20-wire sheath (AWG 22) equipped with one 40-way FCN connector on the module end and one HE 10 molded connector on the Telefast sub-base end
 - **BMXFCC●●●3** cordsets with two 20-wire sheaths (AWG 22) equipped with one common 40-way FCN connector on the module end and two HE 10 molded connectors on the Telefast sub-base end
- 3 16-channel Modicon Telefast ABE 7 Optimum or Universal passive connection sub-bases or adapter sub-bases
- 4 4 types of cordset are available depending on the type of analog module connected to the sub-base (for combinations, see [page 29](#))
 - 4-b : Connection to analog module with 20-way or 28-way removable terminal block:
 - **BMXFCA●●●0** cordsets with a 20-way removable terminal block on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets are available in 1.5 or 3 m/4.92 or 9.84 ft lengths.
 - **BMXFTA●●●2** cordsets with a 20-way terminal block on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets are available in 1.5 or 3 m/4.92 or 9.84 ft lengths.
 - **BMXFTA●●●0** cordsets with a 28-way terminal block on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets are available in 1.5 or 3 m/4.92 or 9.84 ft lengths.
 - 4-c : Connection to analog module with 40-way FCN connector:
 - **BMXFCA●●●2** cordsets with a 40-way FCN connector on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets are available in 1.5 or 3 m/4.92 or 9.84 ft lengths.
 - 4-d : Connection to HART analog input module:
 - **BMXFTA1522/3022** cordsets with a 20-way removable terminal block at the module end and a 25-way SUB-D connector at the Telefast sub-base end. Cordsets are available in 1.5 or 3 m/4.92 or 9.84 ft lengths.
 - Connection to HART analog input module:
 - **BMXFCA●●●0** (see description in section 4-b)
- 5 Modicon Telefast ABE7CPA analog and application-specific connection sub-bases (for combinations, see [pages 29](#)):
 - **ABE7CPA410** allows connection on a screw terminal block of 4 current/voltage inputs, with provision and distribution of 4 isolated protected power supplies for the current loop inputs
 - **ABE7CPA412** allows connection on a screw terminal block of 4 thermocouple inputs, with supply of cold-junction compensation for these inputs
 - **ABE7CPA21** allows connection on a screw terminal block of 4 current/voltage outputs
 - **ABE7CPA02** allows connection on a screw terminal block of 8 current/voltage I/O
 - **ABE7CPA03** allows connection on a screw terminal block of 8 inputs, with provision and distribution of the power supply (with limitation of each current loop) for the current/voltage outputs of the **BMXAMO0210** analog module
 - **ABE7CPA31, ABE7CPA31E** allow connection on a screw terminal block (**ABE7CPA31**) or a spring-type terminal block (**ABE7CPA31E**) of 8 inputs, with provision and distribution of the power supply (limited to 25 mA per input)
- 6 **ABE7ACC02** sub-base for splitting 16 into 2 x 8 channels, allowing connection of 8 channels
- 7 8-channel Modicon Telefast ABE 7 Optimum or Universal passive connection sub-bases or adapter sub-bases

Combinations of discrete inputs/outputs on the Modicon X80 platform with ABE7 sub-bases

1a Discrete I/O modules equipped with HE 10 connectors

1b Analog I/O modules, equipped with 25-way SUB-D connectors

1c Application-specific modules with screw terminals

2a A single type of cordset equipped with 20-way HE 10 connectors, for 8,12, or 16-channel modularity. The HE 10 connectors can be molded, **TSXCDP***** (AWG 22) or insulation piercing, **ABFH20H***** (AWG 28).

These cordsets are available in various lengths. They use AWG 28 (0.08 mm²) for connecting input and output sub-bases rated 100 mA directly, as well as sub-bases with relays.

Adapter **ABE7ACC02** allows connection of sub-bases with 8-channel modularity.

2b All analog signals are connected with a **TSXCAP030/100** preassembled cordset equipped with 25-way SUB-D connectors, to provide shielding continuity.

3a 8-channel Modicon Telefast ABE7 sub-bases

3b Sub-bases dedicated to counter and analog channels:

- **ABE7CPA02** for connecting current, voltage, or PT100 inputs on a screw terminal block
- **ABE7CPA03** with 4-20 mA sensor loop power supply and 25 mA/channel limiter
- **ABE7CPA21** for connecting output modules with 4 analog channels on a screw terminal block
- **ABE7CPA31** with the 4-20 mA sensor loop isolated power supply for 8 input channels isolated from one another
- **ABE7CPA11** for connecting an absolute encoder with parallel outputs
- **ABE7CPA12** for connecting 16 thermocouple probes

4a 16-channel Modicon Telefast ABE7 sub-bases

5a Splitter sub-bases for connecting discrete I/O in parallel from a Modicon Telefast ABE7 sub-base on 2 different PLCs:

- **ABE7ACC10** for output redundancy
- **ABE7ACC11** for input redundancy

6a **ABE7CPA01** sub-base dedicated to connecting axis control and counter inputs on a terminal block

The 24 V---power supply is connected using Telefast sub-bases only. The 0 V---connections must be equipotential.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for I/O modules for

Modicon Quantum platforms

1-2 Cabled connectors combining a standard screw terminal block, two multicore (AWG 22) cables and two 20-way HE 10 connectors. Two types of cabled connector are available:

- ABFM32H150, ABFM32H301** 1 cabled connectors for I/O modules (32 channels) on the Modicon Quantum platform, with 2 HE 10 connectors each integrating 16 channels
- ABFM32H301** 2 cabled connector I/O modules (32 channels) on the Modicon Quantum platform, with 2 HE 10 connectors each integrating 16 channels and an external power supply with a direct connection to the terminal marked (1) on the sub-bases **6**.

ABF08S202 cabled connector for analog I/O modules (8 channels) on the Modicon Quantum platform equipped with a standard screw terminal block at one end and a 25-way SUB-D connector at the other end

- 3** Cordsets (AWG 22) equipped with a 20-way HE 10 connector **TSXCDP053/•03** for 96-channel I/O modules (connected on six 20-way HE 10 connectors)
- 4** **ABE7ACC02** splitter box (16 to 2 x 8 channels) for use with 8-channel sub-bases
- 5** A single type of cordset equipped with 20-way HE 10 connectors, irrespective of the 8 or 16-channel modularity. The HE 10 connectors can be molded **TSXCDP•••** or insulation piercing **ABFH20•••**.
- 6** 8 and 16-channel connection sub-bases from the Modicon ABE 7 range

(1) The 24 V ... power supply for the Quantum I/O modules must only be connected via Telefast ABE7 sub-bases. The 0 V ... connections must be equipotential.

Note: For harsh environments, **Modicon ABE9** IP67 passive splitter boxes can be used in combination with I/O modules on the Modicon Quantum platform. Main characteristics:

- 8/16 I/O channels
- Connection of 1 to 16 sensors/actuators
- M12 I/O connectors
- Connection to the PLC by connector or multicore cable
- IP67 degree of protection
- Plastic case

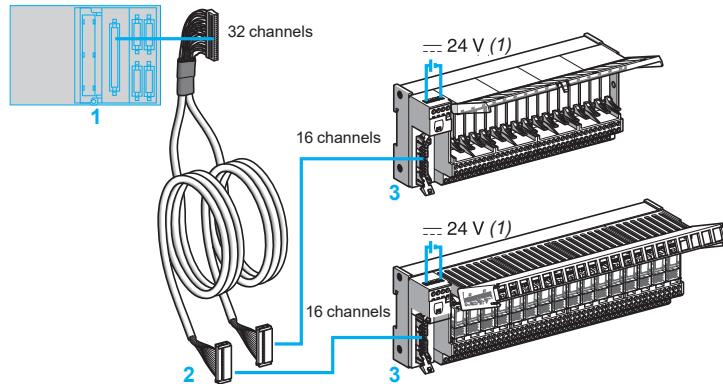

Please consult our website www.schneider-electric.com.

(1) With the **ABE7ACC02** splitter sub-base (16 channels as 2 x 8).

(2) With **140DDI35300** module only.

(3) With **140DDI185300** module only.

Cordsets for Allen Bradley SLC500 PLCs

- 1 For the SLC500 range, specially designed cordsets connect to I/O modules that are equipped with 40-way HE 10 connectors, integrating 32 channels.
- 2 ABFH40H300 cordset for connecting 16-channel sub-bases. These are preassembled with one 40-way HE 10 connector at the PLC end and 2 x 20-way HE 10 connectors at the Telefast end. Available in 3 m (9.84 ft) lengths, AWG 22, there are 2 types of "Y" form cable: one exclusively for inputs and one for outputs.
- 3 16-channel sub-bases. It is possible to use 8-channel sub-bases by inserting the [ABE7ACC02](#) adapter.

(1) The power may be supplied via the PLC terminal block or via the Telefast sub-base.

Preassembled cordsets

Cordsets for Siemens S7 PLCs

- 1 The 24 V \equiv power supply can be provided via 6ES7-**●●●** terminal blocks connected to the PLC modules.
For the S7200/300/400 ranges, the specially designed cordsets connect to the manufacturer's terminal blocks with 16-way HE10 connectors. Each connector has 8 channels.
- 2 ABFH32H**●●●** cordsets for connecting 16-channel sub-bases. These are preassembled with 2 x 16-way HE 10 connectors at the S7 PLC end and one 20-way HE 10 connectors at the Telefast end. Available in 1.5 and 3 m (4.92 and 9.84 ft) lengths, AWG 26, these "Y" form cables only connect the I/O controlling the relay sub-bases.

(1) The power may be supplied via the PLC terminal block or via the Telefast sub-base.

 Preassembled cordsets

ABE7_603_ADDPM16001

- 1 I/O modules equipped with HE 10 connectors. Available in modules of 8, 12, 28, and 64 I/O.
- 2 A single type of cordset equipped with 20-way HE 10 connectors, irrespective of the 8,12, or 16-channel modularity. The HE 10 connectors may be molded (TSXCDP●●●) or insulation piercing (ABFH20H●●●). These cordsets are available in 0.5 m/1.64 ft, 1 m/3.28 ft, 2 m/6.56 ft, 3 m/9.84 ft and 5 m/16.40 ft lengths. They use AWG 28 (0.08 mm²) for connecting inputs and relay sub-bases, and AWG 22 (0.324 mm²) for direct connection of 0.5 A outputs of 8 and 28 I/O modules.
- 3 16 channels may be split into 2 x 8 channels using splitter sub-base ABE7ACC02.
- 4-5 8-channel and 16-channel sub-bases respectively.

(1) The 24 V ... power supply is connected using Telefast sub-bases only. The 0 V ... connections must be equipotential.

(1) Using splitter sub-base ABE7ACC02, which allows 16 channels to be split into 2 x 8 channels

(2) With module TSXCTZ2A, to be used with sub-bases with no LED.

(3) The last four channels are not used.

(4) The last four channels are not used and remain at state 1.

 Preassembled cordsets

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for Twido controller and Modicon TM2 I/O expansion modules

Presentation

Relay and connection functions, with or without polarity distribution, significantly reduce wiring time and eliminate the risk of error.

The Telefast pre-wired system allows fast, reliable and economical remote connection of I/O modules (24 V --- discrete) to operative parts, partly eliminating the single-wire connection and intermediate terminal blocks.

The Telefast ABE7 system can only be connected to Twido modules and Modicon TM2 expansion modules equipped with HE 10 connectors. It consists of cordsets and interface sub-bases.

The Telefast ABE7 range is suitable for all types of connection found in control system devices:

- I/O located in the PLC cabinet
- I/O located directly on the machine or in auxiliary enclosures

All the I/O connection sub-bases comprise output terminals on 2 rows:

- 1st row: connection of the signal
- 2nd row: connection of the common
- 24 V --- for the inputs
- 0 V for the outputs

A 3rd row of optional terminals **ABE7BV20** may be added for connecting another common.

These I/O sub-bases are available in different configurations:

Sub-bases for Twido modular base controllers

- **ABE7B20MPN20**: Sub-base with 12 passive inputs + 8 passive outputs

- **ABE7B20MPN22**: Sub-base with 12 passive inputs + 8 passive outputs
 - individual fuse protection for each output (0.315 A)
 - LED indication
 - blade type isolator for the 0 V common

- **ABE7B20MRM20**: Sub-base with 12 soldered relay inputs + 8 soldered relay outputs
 - 2 A solid state relay (1 x 4 A common/2 channels) on 2 outputs
 - electromechanical relays (1 NO 24 V ---/250 V ~, 3 A) on 6 outputs for adaptation of the current or voltage signal (1 x 10 A common/6 channels)

Sub-bases for Modicon TM2 I/O expansion modules

- **ABE7E16EPN20**: Sub-base with 16 passive inputs

- **ABE7E16SPN20**: Sub-base with 16 passive outputs

- **ABE7E16SPN22** : Sub-base with 16 passive outputs
 - individual fuse protection for each output (0.315 A)
 - LED indication
 - blade type isolator for the 0 V common

- **ABE7E16SRM20**: Sub-base with 16 soldered relay outputs
 - electromechanical relays (1 NO 24 V ---/250 V ~, 3 A) on 16 outputs for adapting the current or voltage signal (1 x 5 A common/4 channels)

Optional terminal block

- **ABE7BV20**

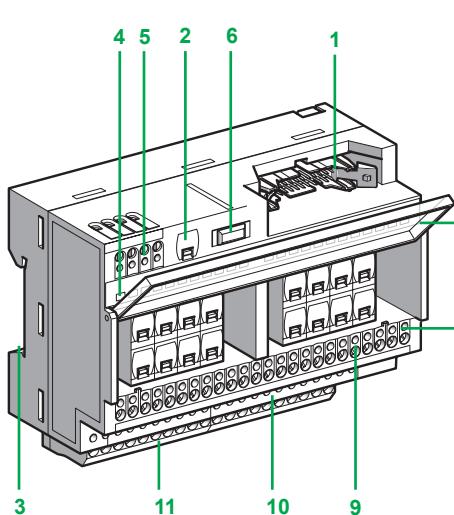

- 20 shunted screw terminals for connecting a single common

Description

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

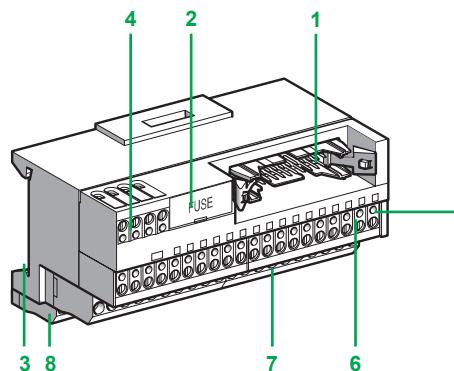

Connection sub-bases for Twido controller and Modicon TM2 I/O expansion modules

Description

ABE7B20M•••••, ABE7E16SRM20, and ABE7E16SPN22 connection sub-bases

- 1 HE 10 connector (20-way for ABE7E16•••••, 26-way for ABE7B20•••••)
- 2 Fuse for the 24 V $\perp\!\!\!/\!$ power circuit
- 3 Rail mounting
- 4 LED for channel indication (on ABE7B20MPN22 and ABE7E16SPN22 only)
- 5 24 V $\perp\!\!\!/\!$ power supply terminal block
- 6 Blade type isolator on 0 V $\perp\!\!\!/\!$ (on ABE7B20MPN22 and ABE7E16SPN22 only)
- 7 Legend holder cover: customer marking on outside and sub-base wiring scheme on inside, providing access to fuses per channel (on ABE7B20MPN22 and ABE7E16SPN22 only)
- 8 Test point for Ø 2.3 mm (0.9 in.) plug
- 9 Upper terminal block for connection of signals
- 10 Lower terminal block for connection of commons
- 11 Additional snap-on terminal block equipped with 20 screw or spring terminals

ABE7E16EPN20 and ABE7E16SPN20 connection sub-bases

- 1 20-way HE 10 connector
- 2 Fuse for the 24 V $\perp\!\!\!/\!$ power circuit
- 3 Rail mounting
- 4 24 V $\perp\!\!\!/\!$ power supply terminal block
- 5 Test point for Ø 2.3 mm (0.9 in.) plug
- 6 Upper terminal block for connection of signals
- 7 Lower terminal block for connection of commons
- 8 Additional snap-on terminal block equipped with 20 screw or spring terminals

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for Twido controllers and Modicon TM2 I/O expansion modules

- 1 Twido Modular base controller with 26-way HE 10 connectors. The modular sizes available are 20 or 40 I/O.
- 2 Modicon TM2 Discrete I/O modules with 20-way HE 10 connectors. The modular sizes available are 16 or 32 I/O.
- 3 Cable (ABFT26B●●0) equipped with a 26-way HE 10 connector at each end. This cable is available in 0.5, 1 and 2 metre lengths (AWG 28/0.08 mm²).
- 4 Cable (ABFT20E●●0) equipped with a 20-way HE 10 connector at each end. This cable is available in 0.5, 1, 2 and 3 metre lengths (AWG 28/0.08 mm²).
- 5 20 channel sub-base (ABE7B20MPN2● or ABE7B20MR20) for modular base controllers.
- 6 16 channel sub-base (ABE7E16SPN22 or ABE7E16SRM20) for output extension modules.
- 7 16 channel sub-base (ABE7E16EPN20 or ABE7E16SPN20) for input or output extension modules.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for Modicon STB

(distributed I/O solution)

Presentation (1)

Using the Telefast connector or adapter system rationalizes and simplifies electrical enclosure wiring.

Far less space is required in the enclosure and the Modicon ABE7 sub-base replaces the connection terminals at the bottom of the enclosure.

The Telefast wiring system is particularly suitable for applications requiring:

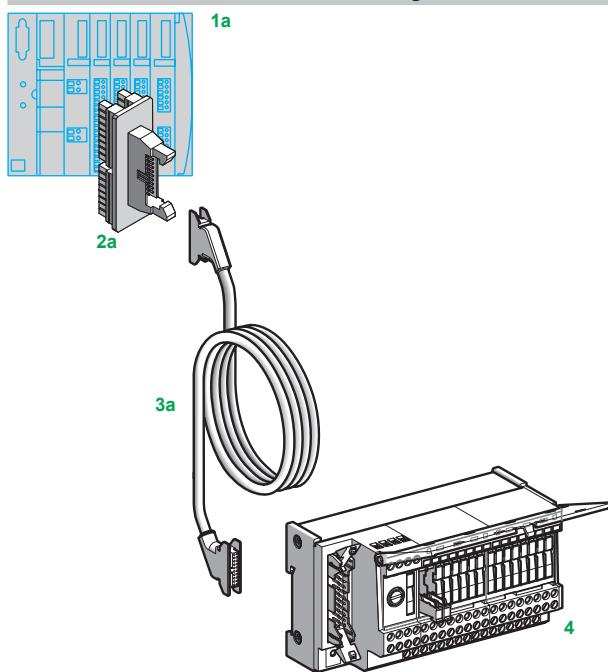

- 48 V $\perp\!\!\!\perp$ and 48 V \sim I/O
- A large number of 115 V \sim and 230 V \sim I/O
- A large number of relay outputs

Connection of Modicon STB I/O modules to the Telefast system differs according to the type of module:

- STBDDI3725 and STBDDO3705 16-channel digital I/O: connection via Telefast HE 10 connectors and their associated Telefast cables or ribbon cables. These connection components must be ordered separately (see description below and combinations on [page 55](#)).
- Other Modicon STB digital and analog I/O modules: connection via screw or spring-type 5/6-way removable connectors, supplied with the I/O modules and the associated pre-wired cables. The latter must be ordered separately (see below).

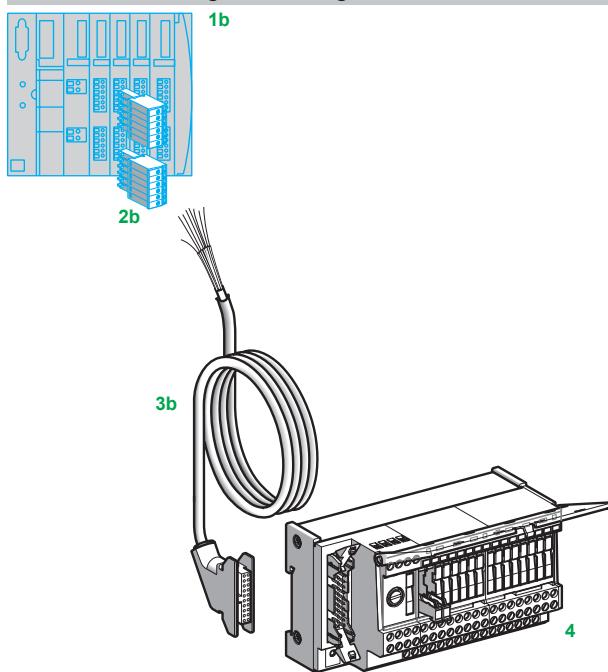

Description (1)

STBDDI3725 and STBDDO3705 16-channel digital I/O modules

- 1a Modicon STB island incorporating a STBDDI3725 or STBDDO3705 module with 16 I/O
- 2a STBXTS5●10 (DDI) or STBXTS6●90 (DDO) HE 10 connector
- 3a TSXCDP●02 rolled ribbon cable or TSXCDP●03 connection cable equipped with two 20-way HE10 connectors
- 4 Modicon ABE7 connection or adapter sub-base (see compatibility table on [page 55](#))

Other Modicon STB digital and analog I/O modules

- 1b STBDDI/DDO●●●K Modicon STB I/O island incorporating a digital I/O module (except for 16-channel modules) or an STBAVI/AI/ART/AVO/ACO●●●K analog I/O module
- 2b Screw or spring-type 5/6-way removable connectors, supplied with the STB I/O module
- 3b TSXCDP301/501/1001 pre-wired cable (3, 5, or 10 m/9.84, 16.4 or 32.8 ft long), with HE10 connector at one end and flying leads at the other end. Cross-section 0.324 mm², AWG24
- 4 Modicon ABE7 connection or adapter sub-base

Redundancy solution for Modicon STB I/O (1)

Two Modicon STB I/O modules of the same type, located in two separate islands, can be connected to a single Telefast pre-wired sub-base (I/O redundancy). This configuration is used, for example, in the context of a Premium Hot Standby architecture (please refer to our "Modicon Premium automation platform" catalog).

Digital I/O modules are connected via an [ABE7ACC11](#) (inputs) or [ABE7ACC10](#) (outputs) redundancy sub-base and the same connectors and cables or ribbon cables used for single connections.

STB analog I/O modules are connected via JM Concept JK 3000 N2 (inputs) and GK 3000 D1 (outputs) analog I/O multiplexers.

(1) If you require any more information on the Telefast pre-wired system, please consult our Customer Care Center.

Presentation

■ ABE9 passive splitter boxes for M12 connectors make it possible to eliminate long and difficult cabling operations. Their modularity and dimensions mean they are the ideal solution for a wide variety of customer applications.
 Connection to the processing unit can either be made by connector or by multicore cable of different lengths.
 IP 67 protection allows these products to be used within processes or machines in harsh environments (splashing water, oil, dust, etc.).
 The splitter boxes, available in 4 or 8-channel versions, allow connection of up to 16 signals maximum, depending on the version (2 per channel).

The characteristics of ABE9C12 splitter boxes are as follows:

- Connection of sensors and actuators using M12, 5-way connectors
- Modularity: 4 or 8 channels
- Mounting system and connection to the processing unit conforming to market standards:
 - center-to-center distances
 - M23, 19-way connector, enabling the use of preassembled cables in order to reduce installation time and the risk of error
 - multicore cable, 5 or 10 meters (16.4 or 32.8 ft) long. The splitter box comprises a connection cover equipped with plug-in terminals, which provides considerable flexibility for replacing damaged parts and changing the cable length.
- ABE9C12●L● sub-bases enable the use of 2 separate commons, which can be used for emergency stop management, for example. This function is accessible beneath the terminal cover using 2 removable links. If both links are removed, the 2 supplies become independent.

The use of a Y-connector allows 2 signals to be connected to the same M12 channel on the splitter box. For example, the ABE9C1281 splitter box (8 channels) allows 16 signals to be connected to the processing unit.

The Y-connector is available in 2 versions:

- M12-M12 for connection of two M12 connectors to a single M12 channel on the splitter box
- M8-M12 for connection of two M8 connectors to a single M12 channel on the splitter box

Complete reference = Splitter box only + Connector with cable

Description

ABE9C12●C23 passive splitter boxes have the following on the front face:

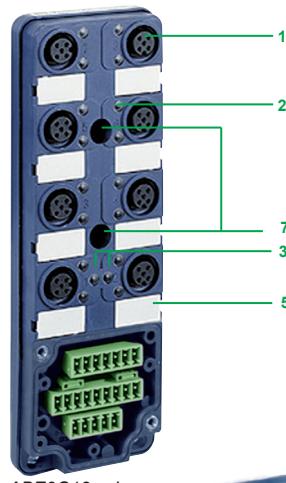

- 1 Four or eight M12 female connectors (depending on model) for connection of sensors and actuators (2 channels per connector)
- 2 Eight or sixteen channel status indicator lights (depending on model)
- 3 One "Power on" indicator light on the splitter box (depending on model)
- 4 One M23, 19-way male connector
- 5 Four or eight channel marker labels
- 6 One splitter box marker label
- 7 Splitter box mounting holes

ABE9C12●L● passive splitter boxes have the following on the front face:

- 1 Four or eight M12 female connectors (depending on model) for connection of sensors and actuators (2 channels per connector)
- 2 Eight or sixteen channel status indicator lights (depending on model)
- 3 Two "Power on" indicator lights on the splitter box (depending on model)
- 4 One removable connection cover equipped with plug-in terminals
- 5 Four or eight channel marker labels
- 6 One splitter box marker label
- 7 Splitter box mounting holes
