

# CODEC IC for digital mobile phone

## BU8732AKV

BU8732AKV is a PCM codec IC for digital cellular phones. This includes plenty of analog input / output functions such as a 14bit precision linear.  $\mu$  / A-LAW codec, a microphone amplifier with two systems, amplifiers for speaker and earphone and a switch transistor for driving a ringer. This IC is the most suitable for both PDC system and CDMA system cellular phones.

### ●Application

Digital cellular phones with CDMA system, Digital cellular phones with PDC system.

### ●Features

- 1) +3V single power supply. ( $V_{DD}=2.7$  to 3.3V)
- 2) 14bit precision linear •  $\mu$  / A-LAW codec.
- 3) Transmission filter of the codec block is in conformity to the ITU-T recommendation G. 714.
- 4) Built-in PLL circuit for system clock generation.
- 5) Built-in DSP I/F which is in conformity with PDC and N-CDMA.
- 6) Arbitrary setting of the clock frequency of PCM data transmission is allowed :  

$\mu$ / A-LAW	64kHz to 2048kHz
Linear	128kHz to 2048kHz
- 7) Plenty of input / output analog functions :
  - Two systems of built-in microphone amplifier (differential input type, single input type)
  - Built-in speaker amplifier for receiver ( $32\Omega$  BTL type)
  - Built-in speaker amplifier for earphone ( $32\Omega$  single type)
  - Built-in speaker amplifier for REXT of call receiving system ( $600\Omega$ )
  - Built-in electronic volumes for gain adjustment. (Call-receiving system, call sending system, TONE system)
  - Built-in input / output circuit for data signal which allows external connection.
  - Pop noise of REXT earphone and receiver outputs at the time of switching on and off the power supply is reduced by means of soft mute.
- 8) A built-in function to generate DTMF signals and musical scale tones is provided in the tone signal generating block.
- 9) Built-in switch transistor for driving a ringer.
- 10) VQFP 48 pin package.

## Communication ICs

## ●Absolute maximum rating (Ta=25°C unless specified particularly)

Parameter	Symbol	Limits	Unit
Digital power supply voltage	DV <sub>DD</sub>	-0.3 to +4.5	V
Analog power supply voltage	RXV <sub>DD</sub>	-0.3 to +4.5	V
	TXV <sub>DD</sub>	-0.3 to +4.5	V
Digital pin apply voltage	V <sub>TD</sub>	DV <sub>SS</sub> -0.3 to DV <sub>DD</sub> +0.3	V
Analog pin apply voltage	V <sub>TA</sub>	RXV <sub>SS</sub> -0.3 to RXV <sub>DD</sub> +0.3	V
		TXV <sub>SS</sub> -0.3 to TXV <sub>DD</sub> +0.3	V
Input current	I <sub>IN</sub>	-10 to +10	mA
Power dissipation	P <sub>d</sub>	400 *1	mW
Storage temperature range	T <sub>STG</sub>	-50 to +125	°C
Operation temperature range	T <sub>a</sub>	-30 to +85	°C

\*1 Drops by 4.0mW per 1°C when used at more than Ta=25°C.

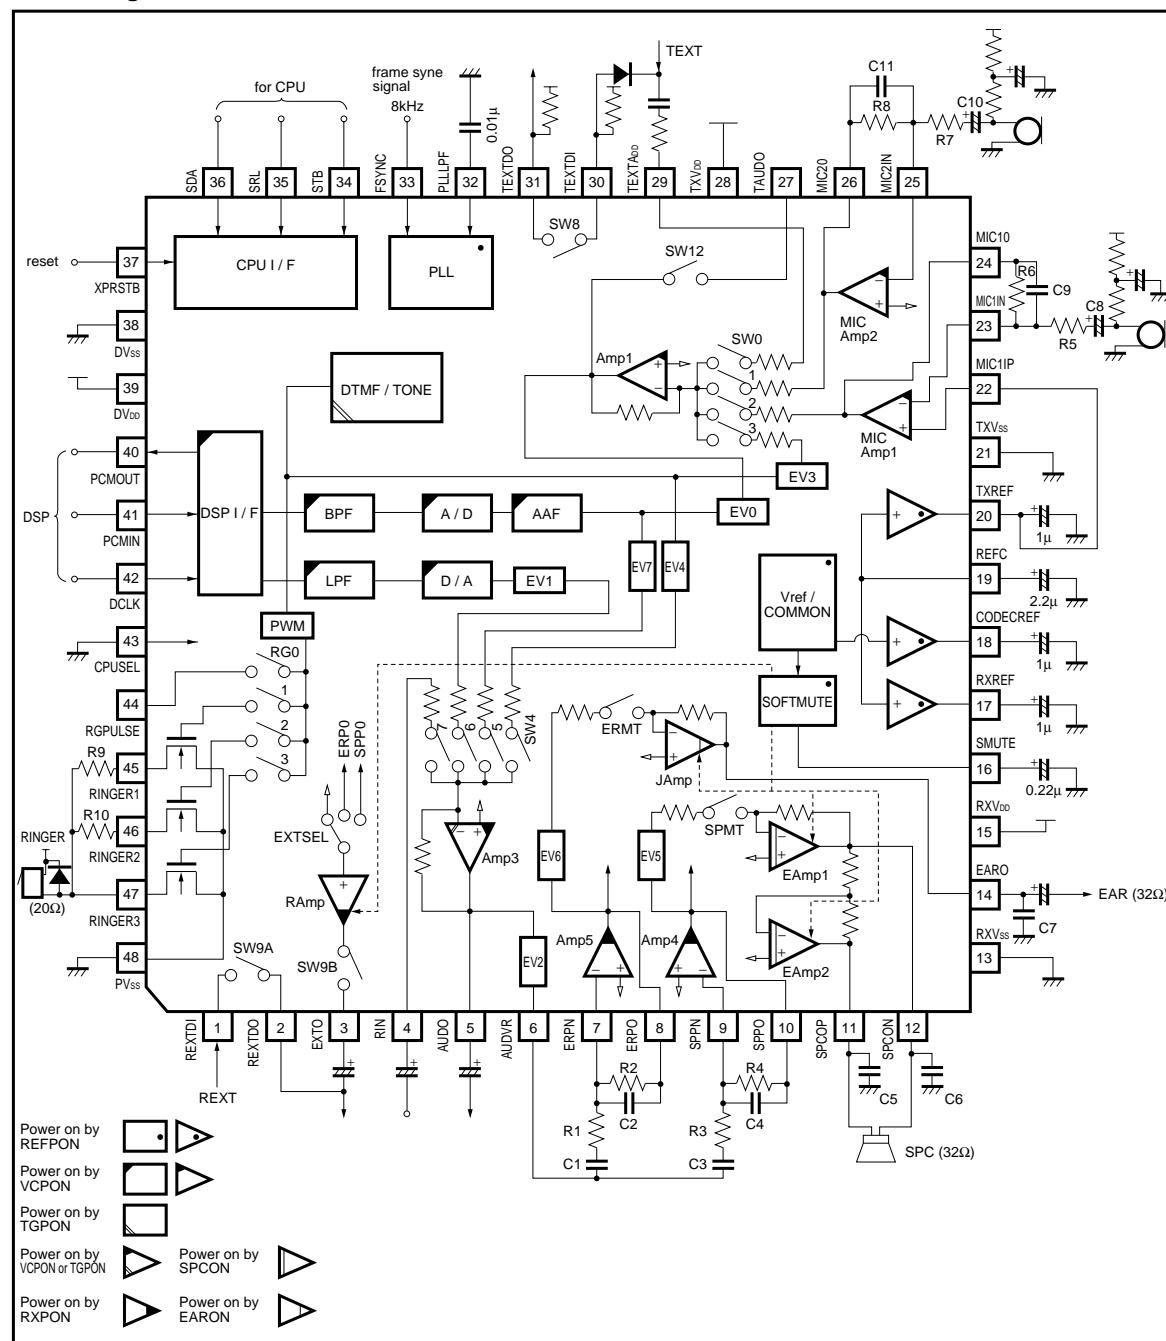

## ●Recommendable operation condition (Ta=25°C unless specified particularly)

Parameter	Symbol	Min.	Typ.	Max.	Unit
Digital power supply voltage	DV <sub>DD</sub>	2.7	–	3.3	V
Analog power supply voltage	RXV <sub>DD</sub>	2.7	–	3.3	V
	TXV <sub>DD</sub>	2.7	–	3.3	V

◎Radiation resistance is not included design.

## ●Electrical characteristics

(Ta=25°C, DV<sub>DD</sub>=RXV<sub>DD</sub>=TXV<sub>DD</sub>=3.0V, FSYNC=8kHz, gain 0dB unless specified particularly)

Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
Current consumption(Note 1)	I <sub>DD1</sub>	—	8.0	11.5	mA	Full operation (Note2)
	I <sub>DD2</sub>	—	7.0	10.2		Reference / Voice / SPC ON (Note2)
	I <sub>DD3</sub>	—	6.0	8.6		Reference / Voice / EAR ON (Note2)
	I <sub>DD4</sub>	—	5.4	7.8		Reference / Voice / RAMP ON (Note2)
	I <sub>DD5</sub>	—	5.1	7.3		Reference / Voice ON (Note2)
	I <sub>DD6</sub>	—	3.7	5.3		Reference / Tone ON (Note2)
	I <sub>DD7</sub>	—	3.3	4.8		Reference ON (Note2)
	I <sub>DD8</sub>	—	0.1	20	μA	All power down, FSYNC, Fixed DCLK terminal
Digital "H" level input voltage	V <sub>IH</sub>	0.8DV <sub>DD</sub>	—	—	V	
Digital "L" level input voltage	V <sub>IL</sub>	—	—	0.2DV <sub>DD</sub>	V	
Digital "H" level input current	I <sub>IH</sub>	—	—	10	μA	V <sub>IH</sub> =DV <sub>DD</sub>
Digital "L" level input current	I <sub>IL</sub>	-10	—	—	μA	V <sub>IL</sub> =0V
Digital "H" level output voltage	V <sub>OH</sub>	DV <sub>DD</sub> -0.5	—	—	V	I <sub>OH</sub> =-1mA
Digital "L" level output voltage	V <sub>OL</sub>	—	—	0.5	V	I <sub>OL</sub> =1mA

\*1) Power supply voltage (DV<sub>DD</sub>, RXV<sub>DD</sub>, TXV<sub>DD</sub>) is 3V. Digital and analog output terminals are free from load.All the digital terminals except FSYNC. CLK terminal are connected to either DV<sub>DD</sub> or DV<sub>SS</sub>.

Analog terminals are connected with an appropriate resistance to TXREF or RXREF.

The soft mute is in the canceled status. (SMUTE="0")

\*2) FSYNC=8kHz, DCLK=256kHz

### Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

#### About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
