

# Solid State Relays

## Industrial, 1-Phase DCS

### Types RD 0605 -D, RD 2001 -D, RD 3501 -D

- DC Solid State Relay
- Rated operational current: 1 and 5 ADC
- Operational voltage range: Up to 350 VDC
- Input range: 3 to 32 VDC
- Isolation: OPTO (input-output) 4000 VACrms

## Product Description

The DC switching relay is used in applications in which there is a need for fast switching of small DC loads with a high input/output isolation of more than 4000 VACrms. The DC switching transistor relay always switches ON and OFF in accordance with the applied control voltage.
