CN-0270

M Series

Dual Seal Waterproof Toggle

IP67 Rated

Series M

General Specifications

Electrical Capacity (Resistive	Load)
Power Level (silver):	6A @ 125V AC & 3A @ 250V AC
	4A @ 30V DC for On-None-On; 3A @ 30V DC for all other circuits
Logic Level (gold):	0.4VA maximum @ 28V AC/DC maximum (Applicable Range 0.1mA ~ 0.1A @ 20mV ~ 28V)
Other Ratings	
Contact Resistance:	10 milliohms maximum for silver; 20 milliohms maximum for gold
Insulation Resistance:	1,000 megohms minimum @ 500V DC
Dielectric Strength:	1,000V AC minimum between contacts for 1 minute minimum;
	1,500V AC minimum between contacts and case for 1 minute minimum
Mechanical Life:	50,000 operations minimum
Electrical Life:	50,000 operations minimum for silver at 3A @ 250V AC; 25,000 operations minimum for silver
	at 6A @ 125V AC; 50,000 operations minimum for gold
Angle of Throw:	25°
Environmental Data	
Operating Temp Range:	–30°C through +85°C (–22°F through +185°F)
Sealing:	Waterproofing, achieved with boot at base of lever plus o-rings inside and outside of bushing, meets IP67 of IEC60529 Standards (dust tight and protection against effects of temporary immersion). See further explanation on last page.
Processing	
Soldering:	Manual Soldering for SIlver: ON-NONE-ON: See Profile B in Supplement section.
-	ON-OFF-ON and (ON)-OFF-(ON): See Profile A in Supplement section.
	Manual Soldering for Gold, all circuits: See Profile A in Supplement section.
	Note: Lever must be in OFF (center) position while soldering.

Distinctive Characteristics

Inner o-ring and external rubber washer seal the switch to achieve IP67 of IEC60529 Standards (dust tight and water protected for temporary immersion).

Waterproof boot at base of toggle further ensures protection against wet environments.

Actuation provides smooth, sturdy tactile feel.

Polished, chrome-plated actuator paired with the waterproof boot not only delivers in terms of sleek design, but also functionality and reliability.

Superb quality and construction design prohibit entry of harmful particles that may otherwise compromise lever operation.

Series M

AT503M Hex Face Nut Brass/Chrome

AT508 Lockwasher Steel with Zinc/Chromate

AT401P O-ring Nitrile Butadiene Rubber

Maximum Effective Panel Thickness .138" (3.5mm)

Series M

APPLICATION CONSIDERATIONS

The Dual Seal Waterproof M Toggle is designed as a panel seal switch, and not to be used under water.

Material Properties

The material for the waterproof boot is silicone rubber. While silicone rubber has excellent heat, cold and weather resistant properties, it has less durability and oil resistance.

The o-rings are made of nitrile butadiene rubber, which excels in durability and oil and chemical resistance. Its performance is less durable with lower weather and ozone resistant characteristics.

Evaluate the products in reguard to your application and intended environment with these properties in mind.

Waterproof Test Conditions

Waterproofing is measured by submersing the switch 5 centimeters from the water surface (see illustration), and opening and closing 50 times at a frequency of 50 – 60 times per minute. The switch is then submersed 1 meter from the surface and left in this position for 30 minutes. Repeat opening and closing

same as previous test. The resulting insulation resistance and voltage capacity are both within the rated values, and water has not entered inside the switch or installation panel.

Panel Installation

Applications

- Construction Equipment
- Hospitality and Restaurant
- Transportation
- Medical Equipment
- Machine Tooling
- Marine Equipment *
- * Salt spray tested as per Mil-STD-810G section 509.5.

Effective Date March 2016
